Education

ACCELERATION

▲ Alkemy

I worked with a small team to develop the front-end for a Colombian NGO, 'Somos Más,' using Discord and GitHub to meet the deadline.

● ADVANCED REACT

▲ Acamica

A three-month course designed to elevate my React skills to an advanced level, focusing on building more complex and dynamic applications.

● FULL STACK DEV REACT-NODE

● Digital House

I started programming by learning HTML, CSS, and JavaScript, then moved on to React for dynamic apps and explored Node.js to understand frontend-backend communication.

Experience

Front-End (React & Angular)

2021 - 2024 **Southern Horizon** (Technology solutions consulting company)

CARMOCAL ENSOL S.A. (Environmental services company)

- I redesigned and developed user interfaces with React for a CRM, focusing on the creation and display of tables that handle large volumes of data.
- I implemented features such as pagination, advanced filters, and real-time search, improving the system's usability.

PAD CHILE S.A. (Paper company)

- I participated in the visual redesign of CRM components, enhancing the user interface and the visual consistency of the system.
- I developed new tables and customized interfaces, facilitating data management within the CRM.

SIELCON S.A. (Betting company)

- I developed and optimized dynamic tables for a CRM system using Angular, improving data management and enhancing the user experience.
- I implemented features such as pagination, advanced filters, and real-time search, improving the system's usability.
